

COM GROUP

(PVT) LIMITED

INTERNATIONAL VEHICLE TRADE

Moving opportunity. Connecting markets.

New & used buses | Used vehicles | Import & export

Proposed Colombo office reception

COMPANY PROFILE / OCTOBER 2026

01 / INTRODUCTION

A Sri Lankan trading vision

International sourcing. Local market understanding. A disciplined approach to vehicle procurement.

IJ COM GROUP (PVT) LIMITED is presented as a Colombo-based import and export business focused on passenger buses and selected vehicles for the Sri Lankan market and international trade opportunities.

The company's business focus includes used Yutong buses, brand-new Yutong bus procurement, used passenger vehicles and enquiries for right-hand-drive vehicles, including the JETOUR J2 model designation requested by customers.

Our commercial approach brings vehicle selection, supplier coordination, inspection planning and shipment documentation into one clear customer process.

GLOBAL SOURCING

Vehicle trade & procurement

02 / PURPOSE

Built around confidence

A clear commercial direction for customers, suppliers and long-term partners.

01 Our vision

To become a respected Sri Lankan vehicle trading group, connecting transport operators and vehicle buyers with suitable international supply opportunities.

02 Our mission

To support informed vehicle purchasing through clear specifications, transparent commercial terms and coordinated sourcing, inspection and delivery arrangements.

03 Our values

Integrity in communication. Care in vehicle selection. Accountability in execution. Respect for customers, colleagues and business partners.

Commercial strength starts with the details: the correct vehicle, clear documentation and an agreed delivery process.

03 / PRODUCT PORTFOLIO

Bus procurement

New and used Yutong buses for customer-specific transport requirements.

Used Yutong buses

Sourcing enquiries for coaches and passenger buses, matched to the requested model, year, seating arrangement, driving configuration, condition and budget.

Brand-new Yutong buses

Order-based procurement coordination, with model specification, production availability, supply terms and delivery arrangements agreed for each transaction.

Applications: tourism and charter services, intercity passenger transport, corporate staff transport and institutional fleets.

Vehicle photographs are supplied reference images. Third-party branding does not establish IJ COM ownership or manufacturer representation.

04 / VEHICLE SOURCING

Choice with clarity

Used vehicles and right-hand-drive procurement enquiries.

The vehicle portfolio focuses on customer-led sourcing of used SUVs and passenger vehicles, with purchasing decisions based on identity, condition, specification and destination-market suitability.

JETOUR J2 / RHD enquiries

The requested JETOUR J2 designation is included as a sourcing enquiry. Exact model identity, factory RHD availability, supply eligibility and specifications must be confirmed before quotation or order acceptance.

The SUV photograph above is a supplied Mercedes-Benz reference image; it does not depict a JETOUR J2. Product availability is confirmed per enquiry.

05 / CUSTOMER JOURNEY

From enquiry to delivery

A proposed service framework for organised vehicle transactions.

01 Define the requirement

Confirm model, quantity, age, seating, RHD configuration, use, budget and delivery expectations.

02 Source and compare

Obtain supplier offers and compare vehicle identity, condition, commercial terms and availability.

03 Inspect and agree

Arrange the agreed inspection scope; document specifications, exclusions, payment terms and responsibilities.

04 Coordinate shipment

Manage the agreed export paperwork, shipping arrangements and destination-side coordination.

05 Complete the handover

Check delivery documents and condition against the agreed contract; coordinate follow-up support where included.

06 / PROCUREMENT DISCIPLINE

Details that matter

Inspection and documentation priorities for each vehicle purchase.

01 Vehicle identity & history

Check chassis and engine identifiers, declared manufacture year, ownership documents and available service information.

02 Condition & specification

Review drivetrain, body, cabin, seating, air conditioning and safety equipment against the agreed inspection scope.

03 RHD & destination suitability

Confirm driving configuration and obtain destination-specific eligibility confirmation before purchase. Any conversion requires separate technical and regulatory assessment.

Inspection scope, warranties and after-sales responsibilities are transaction-specific and must be recorded in the signed supply agreement.

07 / ORGANISATION CONCEPT

People behind the process

A planned professional office environment with a Sri Lankan identity.

Proposed Colombo office concept

The organisational development plan envisages a team of approximately 30-50 people across sales, international sourcing, operations, documentation, finance, customer coordination and administration.

The workplace concept brings together collaborative workspaces, private meeting facilities and a professional reception area, supporting responsive communication with customers and overseas suppliers.

Workforce size and the workplace shown represent the planned operating model and proposed facility design.

08 / GROWTH PROGRAMME

A platform for expansion

USD 50 million proposed investment programme in Sri Lanka.

Proposed showroom concept | Mercedes-Benz, JETOUR & Yutong

The company's stated growth ambition is a USD 50 million investment programme to develop vehicle trading capacity, inventory access, customer-facing facilities and operational support in Sri Lanka.

Priority development areas include vehicle sourcing and working capital, a premium showroom and display environment, inspection and preparation capability, digital sales systems and team development.

USD 50 million is presented as a proposed programme, not confirmed paid-up capital, funds raised or deployed investment. Implementation is subject to funding, approvals and commercial assessment.
